Resident-Only Parking System

At the June 11 Continuation Commission Meeting, an ordinance was discussed that allows the establishment of resident-only parking systems for on street parking or in right-of-ways. This ordinance will be presented for a final reading at the July 1 Commission Meeting.

To establish a resident-only parking system on a street, a resident of such street must contact the City Manager's Office with a receipt of support from 60% of residents of the street. Then, signage will be placed on the street and residents will be issued a permit to display on the windshield of their vehicle. Two permits may be issued per residence per year.

Residents who own their home are eligible for a three year permit; all other residents (those who rent, for example) are eligible for a one year permit that may be renewed with proof of continued residency. If a permit holder is no longer a resident, the permit must be transferred to the new property owner/ residents.
